Re: Feasibility Study for Escondido Beach Access

Dear Mr. Fischer:

We are in receipt of your letter of May 22, 1996. As you will recall, our April 15, 1996 letter requested that the Conservancy refrain from taking any action on April 16 in connection with staff's recommendation regarding the proposed Escondido Beach Access. The basis of our request was that our client had not been provided with legally required notice and the opportunity to be heard regarding matters which may result in a significant deprivation of his property rights. Horn v. County of Ventura, 24 Cal. 3d 605 (1979).

Due to the Conservancy's lack of notice, Mr. Mancuso was prevented from presenting specific public safety, engineering, environmental, and legal issues associated with what is commonly known as the Chiate/Wildman easement, as well as matters concerning the entry of Conservancy contractors and vendors onto his property, which should have been considered by the Conservancy prior to any action pertaining to the scoping and authorization of the proposed study. Prior entries by the Conservancy's agents have damaged areas of Mr. Mancuso's property which are outside of the easement area.

Although your letter does not state whether the Conservancy complied with our reasonable request, its plain implication is that the Conservancy acted despite our request in derogation of our client's due process rights. We would appreciate being advised immediately if the Conservancy did not take any action.

Mr. Michael L. Fischer
June 6, 1996
Page 2

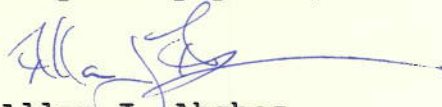

We hope that the Conservancy is willing to recognize its constitutional responsibilities to provide reasonable notice and hearing to directly affected property owners, and that we will be able to avoid costly unproductive litigation. Accordingly, we are requesting that the Conservancy immediately stop the work which your letter implied was authorized on April 16 until a duly noticed hearing has taken place. We would appreciate your written response to this request so that we can determine how to appropriately proceed.

None of the items described in your May 22nd letter indicates that the Conservancy sought or attempted any direct mail notice to Mr. Mancuso, who is the fee owner of a portion of the property affected by the easement, as required by law. For your information, Ms. McCabe does not represent Mr. Mancuso. In addition, Ms. McCabe also confirmed to me by telephone that she has not informed the Conservancy that she is representing Mr. Mancuso. In your letter of May 22nd you referenced and included Conservancy correspondence dated April 1, 1996. Such correspondence is addressed to Mr. Jonathan Horne, who does not represent Mr. Mancuso. In addition, such letter makes no mention of the April 16th action item.

Finally, in accordance with the Public Records Act, we are requesting a complete copy of the administrative record pertaining to the Chiate/Wildman easement. We will, of course, reimburse the Conservancy for the cost of copying the record.

Once again, we would appreciate receiving immediate written advice as to the Conservancy's position and whether the Conservancy is willing to voluntarily stop the work authorized on April 16th so that we can determine how to appropriately proceed.

Very truly yours,

Allan J. Abshez

cc: Mr. Frank Mancuso

Los Angeles, CA 90067-4276

Dear Mr. Abshez:

I am responding to your letter of May 15, 1996 to Brenda Buxton regarding the feasibility study for the Chiate/Wildman easement. The staff recommendation for this feasibility study was approved by the Conservancy at the May 16, 1996 meeting and a copy of the recommendation is attached.

Our mailing list for issues regarding the Chiate/Wildman easement, including this feasibility study, has Ms. Susan McCabe as Mr. Mancuso's representative. In my attached letter of April 1, 1996, I informed Ms. McCabe and other representatives that the Conservancy would be continuing its feasibility study of the easement. In addition, Ms. Buxton faxed a copy of the staff recommendation for the feasibility study to Ms. McCabe at the Rose and Kindle office in Sacramento on May 9, 1996.

We would appreciate a letter from Mr. Mancuso clarifying who is his representative and where he would like us to direct future notices or discussions regarding this easement.

As you will see in the attached staff recommendation, the Conservancy is taking no action regarding the construction of this easement. We will be hiring technical experts to evaluate the easement's construction feasibility. Construction of the Chiate/Wildman easement would require a separate authorization by the Conservancy.

Mr. Allan Abshez
May 22, 1996

Re: Feasibility Study for Escondido Beach Access
Development

Dear Ms. Buxton:

We are writing on behalf of our client, Frank Mancuso, who is the owner of a portion of the fee ownership underlying the "Chiate/Wildman easement" (the "Easement"). Yesterday we learned that the Conservancy's May 16th agenda includes an action item pertaining to the Easement. Mr. Mancuso received no personal notice regarding such item as required by law. Accordingly, we are writing to object to the Conservancy's consideration of any action regarding the Easement at its May 16th meeting.

In addition to the fact that Mr. Mancuso has not been provided with personal notice regarding the May 16th meeting, Mr. Mancuso wishes to be able to present to the Conservancy specific public safety, engineering, environmental, and legal issues associated with the Easement, which should be considered by the Conservancy prior to the Conservancy taking any action or expending any public funds in connection with the Easement. By virtue of the lack of notice, Mr. Mancuso is unable to submit these comments in time for the Conservancy's May 16th meeting.

Ms. Brenda Buxton
May 15, 1996
Page 2

For all of the foregoing reasons, we respectfully request that such item be removed from the Conservancy's May 16th agenda until Mr. Mancuso is afforded proper notice and can make provision to attend or submit comments to the Conservancy.

Very truly yours,

Allan J. Abshez

cc: Mr. Frank Mancuso

We are writing on behalf of our client, Frank Mancuso, who is the owner of a portion of the fee ownership underlying the "Chase/Wildman easement" (the "Easement"). Yesterday we learned that the Conservancy's May 16th agenda includes an action item pertaining to the Easement. Mr. Mancuso received no personal notice regarding such item as required by law. Accordingly, we are writing to object to the Conservancy's consideration of any action regarding the Easement at its May 16th meeting.

In addition to the fact that Mr. Mancuso has not been provided with personal notice regarding the May 16th meeting, Mr. Mancuso wishes to be able to present to the Conservancy specific public safety, engineering, environmental, and legal issues associated with the Easement, which should be considered by the Conservancy prior to the Conservancy taking any action regarding any public funds in connection with the Easement. Due to the lack of notice, Mr. Mancuso is unable to present his comments in time for the Conservancy's May 16th meeting.

Project Summary
May 16, 1996

CHIATE/WILDMAN EASEMENT FEASIBILITY ANALYSIS

File No. 88-046

Project Manager: Brenda Buxton and Lisa Ames

RECOMMENDED ACTION: Authorization to disburse funds to retain technical specialists to assist in the pre-project feasibility analysis and design of the Conservancy-held Chiate/Wildman access easement and the adjacent, unaccepted Offer-to-Dedicate a parking easement.

LOCATION: 27900-10 Pacific Coast Highway, Malibu, Los Angeles County (Exhibit A)

PROGRAM CATEGORY: Public Access and Dedications and Donations

ESTIMATED COST: up to \$38,500

PROJECT SUMMARY: If this authorization is approved, staff will be able to further analyze construction feasibility of a Conservancy-held vertical access easement and its accompanying Offer-to-Dedicate a parking easement (currently not yet accepted by the Conservancy or any other entity) at Escondido Beach, Malibu. Before staff can evaluate the relative merit of any alternatives to the Chiate/Wildman site or return to the Conservancy with a recommendation to construct the Chiate/Wildman access easement, staff needs to answer the following questions about the Chiate/Wildman vertical and parking easements: are the easements buildable; if they are, how would they be built; and how much will they cost to construct? The feasibility analysis will answer these questions by evaluating site conditions and constraints, considering various design alternatives, and estimating construction costs. Staff expects this work to cost no more than \$38,500.

The feasibility analysis will present staff with an accurate cost estimate which is needed in order to determine if the Chiate/Wildman easement can be built with the specifically designated funds (known as the "Black Tor" funds), which the Conservancy holds in a special deposit account. (The currently available cost estimate is six years old and does not include geotechnical information which is critical for formulating a reasonably accurate cost estimate.) In addition, staff needs to examine the design alternatives of the feasibility analysis in order to assess the environmental impacts created by an access construction project at the Chiate/Wildman site.

an exchange for an alternative accessway would be the subject of a future staff recommendation. In the meantime, the staff will continue to diligently pursue the preparatory work precedent to construction of the access improvements at the easement currently held by the Conservancy.

Project Financing: The feasibility study would be funded by a special deposit account, set aside pursuant to a Coastal Commission permit condition for the purpose of building the Chiate/Wildman easements. Approximately \$412,000 remains in the account, \$3,200 having been spent on the topographical survey of the vertical easement. One of the key parts of the construction feasibility study is the cost estimate which will inform the Conservancy whether or not it can construct the Chiate/Wildman easements for the amount available in the special deposit account.

Site Description: The Chiate/Wildman vertical easement (27900-10 Pacific Coast Highway) runs through an existing gate, driveway, and tennis court, past two houses, and then along the walls of a steep ravine. The improvements in the vertical easement were made without Conservancy authorization and would be removed at the property owner's expense. The Offer-to-Dedicate parking easement is over the eastern 25 feet of the property. Staff estimates that the Offer-to-Dedicate for a parking easement (currently not accepted by the Conservancy), if developed, would only hold about eight cars due to various constraints, such as an overlapping CalTrans easement, a ravine, and the necessity to allow the fee owner access to his property. This issue will be examined in more detail in the feasibility analysis. The topography of the parking and vertical easements will likely make construction of the easements challenging. This underscores the importance of thoroughly investigating construction feasibility before recommending construction.

Project History: The Conservancy accepted the vertical easement in 1982 and, although the Conservancy authorized the acceptance of an accompanying Offer-to-Dedicate a parking easement, acceptance was not completed due to unauthorized improvements in the easement area that would need to be relocated before the parking area could be constructed.

In 1990, as a result of a Coastal Commission permit action, the Conservancy received funds specifically designated to construct the Chiate/Wildman vertical easement or an alternative approved by the Commission's Executive Director and the Conservancy's Executive Officer. Approximately \$412,000 is available for construction of the Chiate/Wildman easement.

Over the last six years, the property owners have presented beach access alternatives to the Conservancy in exchange for extinguishing the Chiate/Wildman vertical easement and Offer-to-Dedicate a parking easement. An "in-lieu" cash settlement was rejected because it may not have mitigated the impacts of development due to the difficulties the Conservancy would likely have in

locating a willing seller of public beach access easements. Staff also turned down other alternatives such as a parking area on the inland side of Pacific Coast Highway, and more recently, a parking area on a steep slope at the junction of Malibu Cove Colony Drive and Pacific Coast Highway because of site constraints (no safe highway crossing, geological instability, etc.) and neighborhood opposition.

Last summer, a proposal to exchange the Chiate/Wildman easement with an alternative easement and the opening of two other vertical access easements were the subject of some controversy in the local community. Staff received numerous letters regarding the potential exchange which were attached as exhibits to the September 20, 1995 staff recommendation. To summarize, some local residents objected to the concept of trading accessways and argued that the property owners should be forced to comply with their permit conditions (*i.e.*, allowing the construction of the vertical and parking); others pointed out that the Chiate/Wildman easement was directly across from their homes and would be their primary beach access, and finally, many, particularly those on Malibu Cove Colony Drive, opposed the specific alternative discussed at that time: a 13-car parking lot on a steep sloping lot. That alternative since has been abandoned due to the infeasibility of constructing parking on an unstable slope.

**CONSISTENCY WITH
CONSERVANCY'S
ENABLING LEGISLATION:**

The proposed authorization is recommended pursuant to Chapter 9 of Division 21 of the Public Resources Code.

Public Resources Code Section 31400 states that the Conservancy should have a "principal role in the implementation of a system of public accessways" to guarantee the public's right to access and enjoyment of the coast. The first step in implementing the Chiate/Wildman accessway, one part of a system of accessways to the Malibu coast, is to complete a feasibility analysis.

Under Public Resources Code 31400.3, the Conservancy may provide such assistance as is required to aid in the establishment of a system of public accessways. This feasibility analysis is necessary before the Conservancy can establish the public access improvements to the Chiate/Wildman easement.

Section 31404 allows the Conservancy to take title to properties for public access but does not require the Conservancy to open such properties to public use if "the benefits of public use would be outweighed by the costs of development and maintenance." This feasibility study will enable Conservancy staff to make this evaluation by estimating the costs of access development.

Section 31405 states that the Conservancy may collect fees for the purpose of providing public access and use such funds for

development of coastal accessways. The Conservancy has received funds specifically designated for the development of access improvements at the Chiate/Wildman easement and will use a portion of these funds for the feasibility analysis. The construction feasibility analysis is necessary if the Conservancy is to develop the Chiate/Wildman accessway for public use.

**CONSISTENCY WITH
CONSERVANCY'S
PROGRAM GUIDELINES:**

The project is consistent with the Conservancy's Access Program Guidelines in the following respects:

Urgency: Locating an operation and management entity to take responsibilities for new accessways in Malibu has been quite difficult. The MRCA's offer to operate and maintain the Chiate/Wildman easement represents an unique opportunity that should be taken advantage of as soon as possible. However, the Conservancy needs to first evaluate if and how it would construct the necessary physical improvements to the easement (the purpose of the feasibility analysis) and then, actually build the improvements before the MRCA can assume management responsibilities.

Consistency with Coastal Access Standards: The Conservancy's coastal access standards set forth various criteria for the development of coastal accessways, such as the accessways should safely accommodate public use, minimize the alteration of natural land forms, provide site amenities, etc. One of the purposes of this feasibility study is to determine how to construct the Chiate/Wildman accessway in a manner consistent with the Coastal Access Standards.

Cost-Effectiveness: This feasibility analysis will determine the most cost-effective way to construct the improvements at the Chiate/Wildman easement.

Local Coastal Program Consistency: Malibu does not have a certified Local Coastal Program at this time. The approved County Land Use Plan, a document used to guide coastal planning until the LCP is certified, recognizes Escondido Beach as a priority access area and calls for accessways at every 2,000 feet along the coast. Construction of the Chiate/Wildman vertical easement is consistent with the LUP because the easement is approximately 2,000 feet from either of the nearest accessways: the privately-owned Paradise Cove beach and the Seacliff accessway at 27420-28 Pacific Coast Highway. This feasibility analysis is part of the usual pre-project evaluation undertaken by the Conservancy before developing an accessway.

**CONSISTENCY WITH
COASTAL ACT:**

This feasibility study is consistent with the policies and goals of the Coastal Act. Section 30210 of the Coastal Act states that "maximum access . . . shall be provided for all the people." Construction of the Chiate/Wildman accessway improvements

would be consistent with this section since the Conservancy would be utilizing Offers-to-Dedicate Public Access to provide the maximum access possible to the Escondido Beach area. Because Offers-to-Dedicate were required by the Coastal Commission as conditions of permitted development, the construction of these vertical and parking easements would implement specific findings of the Commission regarding the need for public access at this location. The feasibility study will assist the Conservancy in determining if and how it can fulfill this goal of maximizing access by constructing the Chiate/Wildman accessway.

**COMPLIANCE
WITH CEQA:**

The proposed use of environmental professional services for feasibility studies involves only basic data collection, research, and resource evaluation. These activities will not result in a serious or major disturbance to an environmental resource and, thus, are categorically exempt from CEQA review pursuant to 14 California Code of Regulations Section 15306.

In addition, the proposed authorization is statutorily exempt from CEQA pursuant to 14 California Code of Regulations, Section 15262, which provides an exemption for feasibility and planning studies for possible future actions not yet approved. Construction of the Chiate/Wildman easement or the authorization of an easement exchange will be subject to CEQA review when presented to the Conservancy for approval.

Location of Offers-to-Dedicate Public Access Escondido Beach, Malibu

held or to be accepted by Coastal Conservancy

Exhibit A.

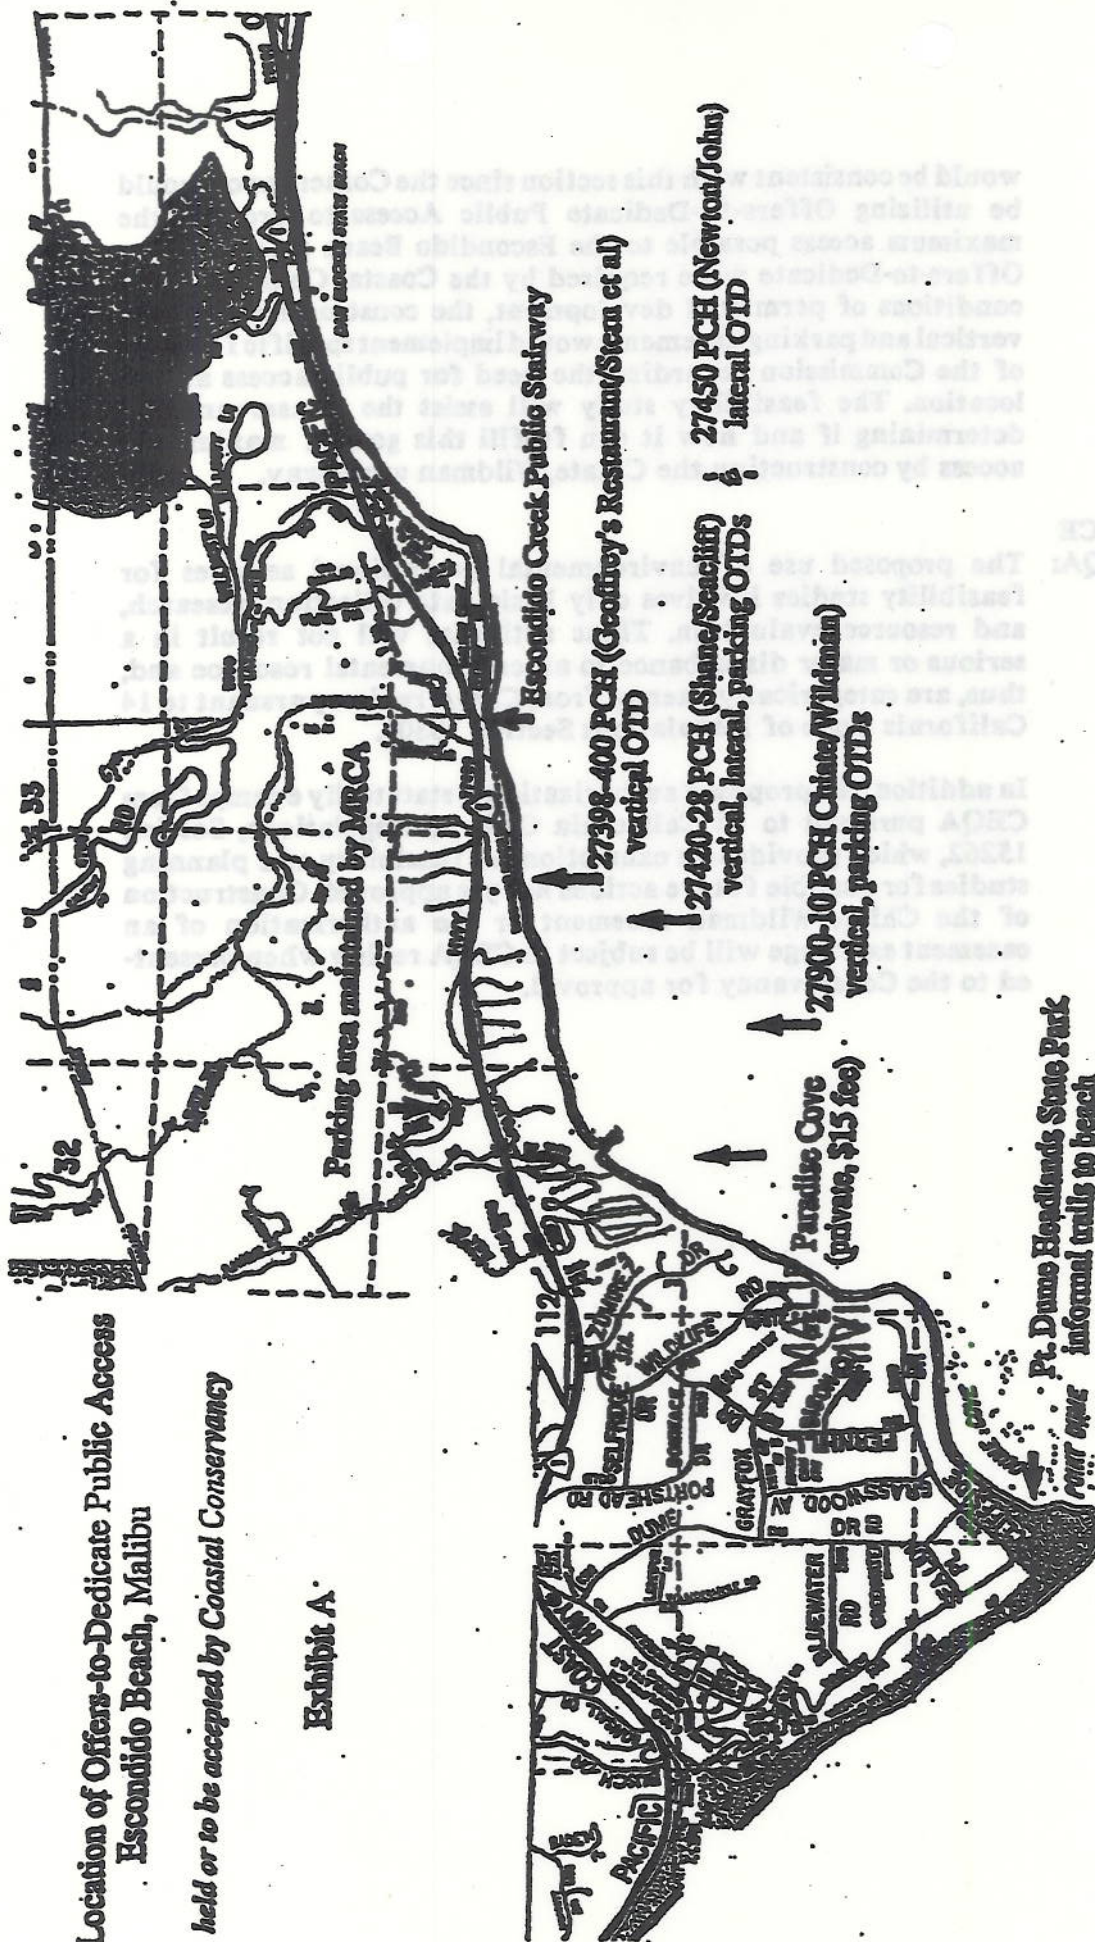

EXHIBIT B

STATE COASTAL CONSERVANCY

Project Summary
September 20, 1995

MALIBU ACCESS: ESCONDIDO BEACH

File No.: 95-010
Project Manager: Brenda Buxton

RECOMMENDED ACTION: Authorization to (1) accept two vertical access easements, two lateral access easements, and one parking easement, (2) enter into a 20-year interagency agreement with the Mountains Recreation and Conservation Authority (MRCA) to operate and maintain three vertical access easements and two parking easements, and (3) disburse \$82,000 to the Mountains Recreation and Conservation Authority for operation and management.

LOCATION: 27398-400, 27420-28, 27450, and 27900-10 Pacific Coast Highway, Escondido Beach, Malibu, Los Angeles County

PROGRAM CATEGORY: Public Access

COST ESTIMATE: Coastal Commission Malibu Beach Access Fund: \$82,000

PROJECT SUMMARY: If approved, this project would open up three new accessways along Escondido Beach in Malibu and require no Conservancy bond funds.

Despite the existence of well-known beaches, such as Zuma and Topanga, many miles of the Malibu coast are inaccessible to the public. Along some sections of the coast, development precludes beach access, while in other areas the beaches suffer from extensive erosion, leaving little space for public access between houses and the ocean. This lack of coastal access could be ameliorated by the acceptance and opening of Malibu's 12 vertical Offers-to-Dedicate (OTDs), but to date, most vertical OTDs are unaccepted and closed due to the lack of a management entity capable of operating and maintaining them. The Los Angeles County Department of Beaches and Harbors and the State Department of Parks and Recreation are unwilling to operate smaller, non-revenue-generating accessways such as these. The City of Malibu currently is writing its Local Coastal Plan and has not yet developed any access policies. The City has not assumed operation and maintenance responsibilities for any dedicated accessways at this time.

The Coastal Conservancy has been working to open up key access points along the Malibu coast since 1979. Escondido Beach has long been a priority because it is a wide sandy beach with public access available only at the extreme ends of the mile-long beach: the privately-owned Paradise Cove (with a \$15 fee for day-use parking) at the western end of the beach and Los Angeles

County's Escondido Creek accessway at the eastern end (Exhibit A). In addition, this beach has three dedicated vertical accessways that, if opened, would provide public access; two are unaccepted, but constructed, and one has been accepted by the Conservancy, but not yet constructed. Until now, the Conservancy has been unable to open up these important beach access points due to the lack of a management agency.

Recently, however, the Mountains Recreation and Conservation Authority (MRCA) has offered to assume responsibility for operation and maintenance of the accessways on Escondido Beach. MRCA is a joint powers agency consisting of the Santa Monica Mountains Conservancy and the Conejo Recreation and Park District. The MRCA operates rural and urban parks in the Malibu area and the San Fernando Valley and has construction and maintenance crews as well as rangers on its staff. The MRCA prefers to focus on Escondido Beach easements since it maintains facilities along the nearby Escondido Falls trail. At this time, the MRCA lacks the resources to take on management responsibilities for other accessways in Malibu. Additionally, the MRCA is not willing to accept the OTDs. For this reason, Conservancy staff recommends that the Conservancy accept the outstanding OTDs, enter into a 20-year interagency agreement with the MRCA for their management, and disburse \$82,000 to the MRCA for at least the first five years of operation and maintenance costs.

The local community has several concerns regarding management and pedestrian safety which the staff of the Conservancy and the MRCA have attempted to address. In order to allay some of the concerns about privacy and safety, Conservancy and MRCA staff have designed a maintenance program that will include locking the gates at night, regular inspections of the stairs, ranger services available on an on-call basis, and weekly trash pick up. Local residents are also concerned about the possibility of beachgoers parking on the inland side of Pacific Coast Highway and crossing this busy highway. However, as is discussed in the project description, there is extensive oceanside parking adjacent to or near the accessways which will minimize the necessity to cross the highway.

In the past, the Conservancy has sought to increase and improve access by assisting with the costs of acquisition of property and/or construction of stairs, trails, and other facilities. At Escondido Beach, acquisition and construction costs are not an issue. The accessways are already dedicated for public use; two of the accessways are built; and the third accessway, owned by the Conservancy, could be constructed with funds set aside for this purpose in a designated account. Furthermore, the Coastal Commission's Malibu Beach Access Fund could be used to cover the expenses of an operation and maintenance entity. In Malibu, the main obstacle to creating new access has been the lack of a management agency, not the lack of funds or property interests. The Conservancy can best carry out its mandate to implement a system of public coastal accessways by enabling a local entity, in this case the MRCA, to assume management responsibilities.

Dear Mr. Abshez:

I am responding to your letter of May 15, 1996 to Brenda Buxton regarding the feasibility study for the Chiate/Wildman easement. The staff recommendation for this feasibility study was approved by the Conservancy at the May 16, 1996 meeting and a copy of the recommendation is attached.

Our mailing list for issues regarding the Chiate/Wildman easement, including this feasibility study, has Ms. Susan McCabe as Mr. Mancuso's representative. In my attached letter of April 1, 1996, I informed Ms. McCabe and other representatives that the Conservancy would be continuing its feasibility study of the easement. In addition, Ms. Buxton faxed a copy of the staff recommendation for the feasibility study to Ms. McCabe at the Rose and Kindle office in Sacramento on May 9, 1996.

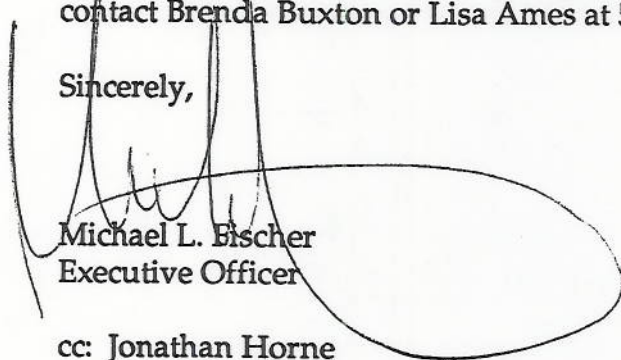

We would appreciate a letter from Mr. Mancuso clarifying who is his representative and where he would like us to direct future notices or discussions regarding this easement.

As you will see in the attached staff recommendation, the Conservancy is taking no action regarding the construction of this easement. We will be hiring technical experts to evaluate the easement's construction feasibility. Construction of the Chiate/Wildman easement would require a separate authorization by the Conservancy.
